Present the
Diabetes Innovation Challenge
Semi-finalists

LATE-STAGE SEMI-FINALISTS
September 29, 2016,
UMass Medical School, Worcester, MA
6-9pm
RSVP

Admetsys
Artificial pancreas

Dibatech
Insulin Storage - Rural/Urban
Slums of South Asia

DiAmyd
GABA based therapeutic

Enable Biosciences
Ultrasensitive auto-antibody test
for population screening

Encellin
Encapsulation device solution
for cell therapy

Glucosight
Measure glucose by pupillary response

New England Breath Technologies
Pain-Free Diabetic Monitoring:
Just a breath away

Orgenesis
Cell replacement therapy

EARLY-STAGE SEMI-FINALISTS
October 5, 2016
UMass Lowell, Lowell, MA
6-9pm
RSVP

Biorasis
Smallest, most accurate
continuous glucose monitoring

CamMed
Thin, flexible patch pump for
one or multiple injectable medications

Clinitech
Electronic Band-Aid for
noninvasive glucose monitoring

Fairbanks
Novel therapies that will promote
formation of new beta cells to replace
those lost in diabetic patients

Glyscend
Orally-administered intestinal coating
which mimics the therapeutic benefits
of bariatric surgery on type 2 diabetes

Integrated Medical
First fully-integrated, low cost, implantable,
wireless, continuous glucose monitoring platform

Jupiter
Noninvasive continuous glucose monitor
**OzStar Therapeutics**
A new combination treatment for type 2 diabetes

**Polyphotonic**
Diabetic retinopathy mask

**Prosenex**
Objective foot screening for peripheral neuropathy

**REMD**
Fully human monoclonal antibody against human glucagon receptor

**Sensulin**
Glucose responsive insulin

**Sigilon**
Transplanting human insulin-producing cells

**Sproutel**
The teddy bear teaching tool

**Zucara Therapeutics**
Drug to prevent hypoglycemia

**Nangiotx**
Returning blood flow to ischemic muscles in diabetics

**Novointestine**
3D Bioprinted gastrointestinal drug delivery system

**QSM**
Sensors in wound dressings for detecting infection

**SFC**
Highly accurate and small dual hormone pumping system

**Sporomex**
Novel bioengineering strategy for beta cell encapsulation

**Theranova** (Intra-peritoneal approach to diabetes management for the development of an artificial pancreas)

**UND**
Lipid-based small molecule as a potential drug to prevent and manage diabetic retinopathy

**Windgap**
Autoinjector that automates the re-hydration and administration of lyophilized drugs
