

T1D Exchange Quality Improvement Collaborative Learning Session 2023

Who We Are: T1D Exchange is a Boston-based nonprofit and one of the leaders in diabetes real-world data and quality improvement through its T1D Exchange Quality Improvement Collaborative (T1DX-QI). The T1DX-QI was established in 2016 as a learning health system to improve outcomes for people with type 1 diabetes (T1D). The program was expanded to include centers caring for people living with type 2 diabetes (T2D) patients in 2021. The T1DX-QI network consists of 54 endocrinology centers (34 pediatric and 20 adult centers) across the U.S. caring for over 100,000 people with diabetes. It is the largest national T1D clinic-based cohort and learning health system using QI principles to drive practice change.

T1DX-QI Learning Session:

Since its establishment in 2016, our organization has ensured that the real-world insights resulting from the T1DX-QI are widely disseminated to the T1D clinical and patient/caregiver communities using a multi-faceted approach. One of the most visible and impactful approaches we utilize to share the findings of our work via the T1DX-QI is hosting biannual T1DX-QI Learning Sessions. The Learning Sessions not only host healthcare providers from our 54 T1DX-QI centers, but also healthcare providers from centers not affiliated with the T1DX-QI, researchers and members from the pharmaceutical and medical device industry. These conferences have allowed our Quality Improvement Team and partner centers to convene to foster engagement with our partner centers and disseminate findings to individuals and organizations outside of the T1DX-QI. The November 2022 Learning Session averaged over 200 attendees per day, demonstrating the impact of this event as a platform to drive meaningful changes in diabetes care and outcomes.

T1DX-QI Learning Sessions not only reach our immediate audience of healthcare providers from participating centers, but also engages the greater T1D healthcare and research communities through publications and enduring materials. In November 2022, Journal of Diabetes published an astounding 36 abstracts covering various presentations from the Learning Session held that month. Highlights from the November 2022 Learning Session are also available to the general public on our website.

T1D Exchange Quality Improvement Collaborative Learning Session 2023

2023 Event Highlights:

T1D Exchange is excited to host our 2023 Learning Session on **November 14th and 15th in New York City**. The T1DX-QI currently has four pediatric and three adult centers in the Metropolitan New York region, making it a critical hub for our ongoing work in advancing equity and improving care and outcomes for the diabetes patient population. Themes to be addressed during this year's event include: patient engagement, health equity & social determinants of health, diabetes distress and diabetes screening. This year's event format will include speaker presentations, continuing education sessions, multiple tracks so attendees can tailor their event experience to their learning needs and sessions/activities designed for healthcare providers at all stages of their careers.

Sponsorship Opportunities:

T1D Exchange is offering four tiered sponsored opportunities for the 2023 T1DX-QI Learning Session. Benefits offered to sponsors include: sponsor acknowledgement in Learning Session publications in peer-reviewed journals, sponsor acknowledgement in the T1DX-QI newsletter (circulation of ~350 healthcare providers), event registrations and other branding opportunities.

Continuing Medical Education (CME) Breakout Sessions: In addition to the aforementioned sponsorship packages, T1D Exchange invites you to support a breakout session during the November 2023 T1DX-QI Learning Session. This year's breakout session topics include a session on AID and a session which aims to engage early career endocrinologists and diabetes healthcare providers.
